

EARTHSMART Actions™

Introducing Earth Smart Actions™ for all Encinitas residents

The City of Encinitas has partnered with BCK Programs to launch Earth Smart Actions™, a guide to taking easy but meaningful environmental actions that can be accomplished from the safety of your home.

Zero Waste

The choices we each make each day have a lasting impact on climate change. Earth Smart Actions™ for Zero Waste lead you to make small changes at home and in your neighborhood to reduce waste going to the landfill and your impact on greenhouse gas emissions.

Stormwater Quality

By identifying common neighborhood pollutants and their sources, you can take action to reduce the impact they have on the ecosystems downstream. These Earth Smart Actions™ for Stormwater Quality are simple steps we can all take to improve water quality in our creeks, lagoons and the Pacific Ocean.
