EXECUTIVE SUMMARY

A Phase I Environmental Site Assessment (ESA) was performed at 1900 N. Coast Highway 101 in Encinitas, California. The site assessment included evaluation of the physical setting of the subject property and surrounding area, investigation into historic uses of the subject property, and review of government databases relating to the site and surrounding area. As of the time this report was prepared a site reconnaissance could not be conducted. All practices conformed to ASTM standard 1527-13 "Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process" and 40 CFR 312 "Standards and Practices for All Appropriate Inquiries." The assessor's parcel numbers for the subject property is 216-041-06-000.

The subject property is a developed property with four structures on site. Once structure is occupied by a restaurant and the other four are office buildings.

The surrounding area is primarily residential with some light retail. A site reconnaissance was conducted on August 15, 2019. No visual indications of environmental degradation were noted on the surrounding properties or on the subject property at that time.

The subject property is listed with the San Diego County Hazardous Materials Management Division (HMMD) and HAZNET databases. The listings include four business entities that were equipment rental businesses at which used oil was collected and sent off site for disposal. There are no records of a release to the environment contained within the records.

There are eight sites listed with releases of hazardous materials to the soil, groundwater, or air within a one-mile radius of the subject property. Review of contaminant monitoring reports along with local topography and hydrology indicates a low probability of contamination migration to the subject property.

Hovey Environmental LLC has performed a Phase I Environmental Site Assessment in conformance with the scope and limitations of ASTM Practice E 1527-13 (Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process) and 40 CFR Part 312 (Standards and Practices for All Appropriate Inquiries) at the property located at 1900 N. Coast Highway in Encinitas. This assessment has revealed no evidence of recognized environmental conditions in connection with the property.

1 INTRODUCTION

This report summarizes the findings of the Phase I Environmental Site Assessment (ESA) at 1900 N. Coast Highway 101 (APN 216-041-06-000). The property is located in Encinitas, California. The ESA was performed in accordance with the recommended practices described in the American Society of Testing Materials (ASTM) Standard E 1527-13: "Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process" and 40 CFR 312 "Standards and Practices for All Appropriate Inquiries." The purpose of the ESA is to determine the existence of or potential for any recognized environmental conditions. A recognized environmental condition is defined as "the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: (1) due to any release to the environment; (2) under conditions indicative of a release to the environment; or (3) under conditions that pose a material threat of a future release to the environment." (ASTM E1527-13).

The Phase I ESA was requested by Bryan Smith of Fenway Capital Advisors as part of the due diligence in the purchase of the property.

The ESA was conducted by performing a site reconnaissance and interview with the current property owner, historic review, review of physical setting of the subject property and surrounding area, and review of city, county, state, and federal databases.

Historical records were reviewed to determine all past uses on the property and any pertinent practices in the surrounding area that may indicate a recognized environmental condition on the property. Table 1.2 lists historical documents reviewed.

Records were obtained from government and historical sources. Regulatory records review included searches of entities or conditions surrounding the property that have the potential to create a recognized environmental condition on the property. Table 1.3 lists federal, state, and local government databases and records searched for environmental contamination information.

The Phase I Environmental Site Assessment was limited to the scope outlined above and to what was reasonably ascertainable. Data gaps encountered in the review of records relating to the property are described in section 6 of this report.

All aspects of the Phase I ESA were performed by Caroline Hovey. Mrs. Hovey meets the requirements for an environmental professional, as defined by 40 CFR 312 and ASTM 1527-13 (see Appendix H for further details.)

2 SITE DESCRIPTION

The subject property is located at 1900 N. Coast Highway101 in Encinitas, California. The property is situated on the eastern side of a coastal bluff and is accessed from the east side off of N. Coast Highway. The total property size is approximately 35, 283 square feet.

There are four structures at the subject property: a restaurant and three office buildings.

The subject property utilizes city water. Wastewater is handled by city sewage system. Storm drains run from the property to N. Coast Highway on the east.

The surrounding area is primarily residential with some light commercial use. A vicinity map is provided in Appendix A and sketch of the subject property is provided in Appendix B.

There are no known environmental liens or activity and use limitations on the property. There are no known valuation reductions due to environmental issues on site.

3 USER PROVIDED INFORMATION / INTERVIEWS

Property information supplied by the owners, users, and other persons is provided in Appendix F.

A property disclosure form was completed by Gary Dewitt, trustee of The Gary Dewitt Trust, property owner since 1986. The disclosures indicate there was hazardous waste oil stored at the subject property in a designated enclosed storage area. The disclosures indicate there are currently four tenants occupying the subject property.

4 SITE RECONNAISSANCE

A site reconnaissance was conducted on August 20, 2019. Gary Dewitt, the property owner, and Peter Curry, the broker, were on site at the time of the site reconnaissance. All interior and exterior portions of the property were inspected.

There are four structures on site, which are the original structures constructed in 1947. The three office structures at the southern side of the property are connected by patio overhangs. These buildings are currently occupied by California Music, Surfers Point, and Plain Clarity. The fourth structure is separate from this and is occupied by Roberto's Mexican Restaurant. Parking is located along the eastern side of the property as well as the western half of the property. There is a non-hazardous waste collection at the north side of the property.

A small slab area with the skeleton of a previous structure is located at the southwest corner of the property. This was the previous location of the enclosure where used oil was kept by the previous tenants. Mr. Dewitt indicated this was an enclosed space utilized by equipment rental companies that were previous tenants at the site, the last of which left the site approximately 10 years ago.

A Phase I ESA was conducted on the adjacent properties to the west and north of the subject property in November 2017 by Hovey Environmental LLC. No concerns for a recognized environmental condition was noted at those sites.

There is a residential community immediately adjacent to the south side of the subject property. The land to the west and north of the subject property is a vacant parcel. North Coast Highway 101 is located on the east side of the subject property. The property is delineated by a fence line to the south, west, and north.

A sketch of the subject property based on observations in 2017 and current aerial photographs and google street images is provided in Appendix B.

5 RECORDS REVIEW

5.1 PHYSICAL SETTING DATA

Information on topography, hydrology, and environmentally sensitive lands was accessed for the subject property and surrounding area. The records reviewed are listed in Table 1.1 (Page 4), and is provided in detail in Appendix E.

The property is located at 33° 4' 50.11" latitude by 117° 18' 29.18" longitude. The approximate elevation at this location is 66 feet above sea level. The highest elevation of the surrounding area is approximately 253 feet above sea level located one mile to the east. The property is situated on a coastal bluff and there is a lower elevation between the subject property and the highest surrounding areas.

Information on groundwater flow and soil type was obtained to determine the ease with which contaminants from surrounding properties can reach the subject property. There is no data provided on groundwater flow rates and direction; however, given the overall topography of the region groundwater is likely to flow primarily from east to west towards the shoreline. The dominant soil type of this area is loamy coarse sand. This soil type is well drained with moderate infiltration rates.

There are wetlands and sensitive lands located in close proximity of the subject property to the west and north. The Pacific Ocean is within 1/8 of a mile to the west and Batiquitos Lagoon is within 1/8 of a mile to the north of the subject property.

5.2 HISTORICAL USE DATA

Several historic records and databases were reviewed to determine past practices at the subject property. The records searched are listed in Table 1.2 (Page 4) and detailed results are provided in Appendix D. Historic data was obtained from building permit reports, city directories, aerial photographs, historic topographic maps, and historic county records. Sanborn fire insurance maps were not available for the subject property.

The property at 1900 N. Coast Highway was listed first listed in the city directories in 1971. Listings on the adjacent properties were primarily residential with some retail and commercial. The following businesses were listed at the subject property. Businesses noted with an * were also listed in the San Diego County Hazardous Materials Management Division and/or HAZNET databases, as discussed in section 5.3.

- 1971 Sleepy Eye Motel
- 1977 CB Radio Center
 Pure Fun Surf Shop
 Tri City Treatment and Pest Control
- 1982 Mission Fence Co.
- 1987 North Coast Lawn Mower Inc. *
- 1992 North County Equipment Inc.
- 1995 Ryder Truck Rental
- 2000 Coral Reef Wet Suits Rebel Rents Inc. * Timeless Teak Furnishings
- 2005 Donna Deuling Rebel Rents Inc. * Roberto's Mexican Food
- 2010 Donna Deuling
 Hair Studio 1900
 Timeless Teak Furnishings
- 2014 Penske Truck Rental

Building permits were issued by the City of Encinitas for 1900 N. Coast Highway 101 in 1987, 1991, 1993, 1995, 2001, 2006, 2007, and 2011. Permits pertained to remodeling and repair activities along with review of fire code reviews for the kitchen fire suppression system.

Historic topographic maps are available for the years 1893 - 2012. Aerial photographs are available from 1939 - 2016. The aerial photograph from 1939 shows vacant land at the subject property. In the aerial photograph from 1947 there are four small structures are visible at the subject property. These remain unchanged until 1979, where there appears to be two structures. Based on the site reconnaissance and information provided by the owner, the structures have remained unchanged since their original construction in the 1940's, but the three structures at the south side of the property are now connected by a patio overhang which makes the appear as one structure in the aerial photos.

The adjacent properties to the west and north appear to have been agricultural land in the mid 1900's. These properties are shown as developed land with structures on site in 1979. The surrounding areas showed significant development between 1939 and 1947.

Based on the historical sources and information provided by the user, the property at 1900 N. Coast Highway 101 was developed as far back as the 1940's; however, earlier improvements were removed and replaced with the current structures between 1964 and 1967. The properties to the west and north were previously part of an agricultural tract of land. In the mid to late 1970's were developed.

5.3 ENVIRONMENTAL & REGULATORY DATA

Table 1.3 (Page 4) lists all federal, state, and local databases accessed to obtain information on potential environmental hazards at the subject property and in the surrounding area. Research results are provided in Appendix E.

The subject property is listed with San Diego County Hazardous Materials Management Division and HAZNET databases due to the storage of hazardous materials on site including used oils and fuel blends under the following business names: Dorado Holdings LLC, North Coast Lawnmower, Rebel Rents Inc, and Handy Equipment Rental. Inspections were conducted at the subject property on 8/25/03, 9/6/05, 1/10/08, and 6/23/09. While violation notices were indicated in the records, all violations related to paperwork and were not indicative of conditions that would cause a release or spill to the environment.

Eight properties within a one-mile radius were listed in the local, county, state, and federal databases searched. The closest property is at 1865 North Vulcan Avenue. This is the site of a soil contamination clean-up in 2012 due to the presence of organochlorine pesticides. Soil was excavated and the case has since been closed. Due to the lower elevation and topographic variation, it is highly unlikely that this site has impacted the subject property.

Three sites were identified with leaking underground storage tanks within one-half mile of the subject property. Remedial action has taken place and the cases have been closed at each of these sites. These locations are all at lower elevation compared to the subject property and it is highly unlikely that they will have impacted the subject property.

There are four sites with environmental releases identified in the databases at a higher elevation compared to the subject property. Based on the location, distance from the subject property and local topography, these sites are unlikely to contaminate the subject property.

All sites within a one-third (1/3) mile radius were evaluated using the Environmental Data Resources Vapor Encroachment Screen (VEC). Results revealed no sites with potential vapor encroachment to the subject property.

Review of the regulatory data for businesses located at the subject and those within a one-mile radius of the subject property revealed a low likelihood of environmental contamination on site due to contaminant migration or a previous release at the site.

6 DATA GAPS

No data gaps were encountered in the preparation of the Phase I Environmental Site Assessment.

7 NON-SCOPE CONSIDERATIONS

The Phase I Environmental Site Assessment does not include evaluations or testing for moisture intrusion or subsequent microbial growth which could become an indoor air contaminant.

The Phase I ESA does not include evaluations or testing for asbestos or lead based paint. The presence of these substances in building materials are not considered a hazard unless disturbed. Any demolition, renovations, remodeling, repair, or repainting activities at the subject property should be done in accordance with the EPA Renovation, Repair, and Repainting Rule (RRP Rule), as well as the Clean Air Act Asbestos National Emissions Standards for Hazardous Air Pollutants (NESHAP).

Based on the age of structures at 1900 N. Coast Highway 101, asbestos and lead-based paint may be present. Based on the condition of this structure, microbial contamination may be present. Evaluations and testing are recommended prior to any remodel or repair of the property.

8 FINDINGS AND OPINIONS

The environmental assessment performed at 1900 N. Coast Highway 101 revealed no areas of potential environmental degradation on site.

Historic records indicate prior uses of the subject property include agricultural, residential, and a restaurant. Historic review revealed no indications of a recognized environmental condition due to previous uses of the subject property.

Investigation into environmental degradation in the surrounding areas revealed a low probability that the subject property contains a recognized environmental condition due to contamination migration from the surrounding area. While the surrounding area has multiple areas identified as containing a recognized environmental condition local topography, hydrology, and physical characteristics indicate a low probability of contaminants traveling to the subject property from these sites.

9 CONCLUSION

Hovey Environmental LLC has performed a Phase I Environmental Site Assessment in conformance with the scope and limitations of ASTM Practice E 1527-13 (Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process) and 40 CFR Part 312 (Standards and Practices for All Appropriate Inquiries) at 1900 N. Coast Highway 101. This assessment has revealed no evidence of recognized environmental conditions in connection with the property. No further environmental review is recommended at this time.

10 SIGNATURE OF INSPECTOR

I certify that the above findings, opinions, and recommendations are true and accurate to the best of my knowledge, and represent the most current knowledge of environmental assessment methods.

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Report is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Report includes a search of available city directory data at 5 year intervals.

RECORD SOURCES

EDR's Digital Archive combines historical directory listings from sources such as Cole Information and Dun & Bradstreet. These standard sources of property information complement and enhance each other to provide a more comprehensive report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer. Reproduction of City Directories without permission of the publisher or licensed vendor may be a violation of copyright.

Certified Sanborn® Map Report

Certified Sanborn® Map Report

08/07/19

Site Name: Client Name:

1900 N Highway 101 Hovey Environmental
1900 N Highway 101 2929 Chatsworth Blvd
Encinitas, CA 92024 San Diego, CA 92106-0000
EDR Inquiry # 5744045.3 Contact: Caroline Hovey

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by Hovey Environmental were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

Certified Sanborn Results:

The EDR Property Tax Map Report

EDR Property Tax Map Report

Environmental Data Resources, Inc.'s EDR Property Tax Map Report is designed to assist environmental professionals in evaluating potential environmental conditions on a target property by understanding property boundaries and other characteristics. The report includes a search of available property tax maps, which include information on boundaries for the target property and neighboring properties, addresses, parcel identification numbers, as well as other data typically used in property location and identification.

Thank you for your business.

Please contact EDR at 1-800-352-0050 with any questions or comments.

EDR BUILDING PERMIT REPORT

About This Report

The EDR Building Permit Report provides a practical and efficient method to search building department records for indications of environmental conditions. Generated via a search of municipal building permit records gathered from more than 1,600 cities nationwide, this report will assist you in meeting the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-13), or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

Building permit data can be used to identify current and/or former operations and structures/features of environmental concern. The data can provide information on a target property and adjoining properties such as the presence of underground storage tanks, pump islands, sumps, drywells, etc., as well as information regarding water, sewer, natural gas, electrical connection dates, and current/former septic tanks.

ASTM and EPA Requirements

ASTM E 1527-13 lists building department records as a "standard historical source," as detailed in § 8.3.4.7: "Building Department Records - The term building department records means those records of the local government in which the property is located indicating permission of the local government to construct, alter, or demolish improvements on the property." ASTM also states that "Uses in the area surrounding the property shall be identified in the report, but this task is required only to the extent that this information is revealed in the course of researching the property itself."

EPA's Standards and Practices for All Appropriate Inquires (AAI) states: "§312.24: Reviews of historical sources of information. (a) Historical documents and records must be reviewed for the purposes of achieving the objectives and performance factors of §312.20(e) and (f). Historical documents and records may include, but are not limited to, aerial photographs, fire insurance maps, building department records, chain of title documents, and land use records."

Methodology

EDR has developed the EDR Building Permit Report through our partnership with BuildFax, the nation's largest repository of building department records. BuildFax collects, updates, and manages building department records from local municipal governments. The database now includes 30 million permits, on more than 10 million properties across 1,600 cities in the United States.

The EDR Building Permit Report comprises local municipal building permit records, gathered directly from local jurisdictions, including both target property and adjoining properties. Years of coverage vary by municipality. Data reported includes (where available): date of permit, permit type, permit number, status, valuation, contractor company, contractor name, and description.

Incoming permit data is checked at seven stages in a regimented quality control process, from initial data source interview, to data preparation, through final auditing. To ensure the building department is accurate, each of the seven quality control stages contains, on average, 15 additional quality checks, resulting in a process of approximately 105 quality control "touch points."

For more information about the EDR Building Permit Report, please contact your EDR Account Executive at (800) 352-0050.

EXECUTIVE SUMMARY: SEARCH DOCUMENTATION

A search of building department records was conducted by Environmental Data Resources, Inc (EDR) on behalf of Hovey Environmental on Aug 07, 2019.

TARGET PROPERTY

1900 N Highway 101 Encinitas, CA 92024

SEARCH METHODS

EDR searches available lists for both the Target Property and Surrounding Properties.

RESEARCH SUMMARY

Building permits identified: YES

The following research sources were consulted in the preparation of this report. An "X" indicates where information was identified in the source and provided in this report.

GLOSSARY

General Building Department concepts

- ICC: The International Code Council. The governing body for the building/development codes used by all jurisdictions who've adopted the ICC guidelines. MOST of the US has done this. Canada, Mexico, and other countries use ICC codes books and guides as well. There are a few states who have added guidelines to the ICC codes to better fit their needs. For example, California has added seismic retrofit requirements for most commercial structures.
- Building Department (Permitting Authority, Building Codes, Inspections Department, Building and Inspections): This is the department in a jurisdiction where an owner or contractor goes to obtain permits and inspections for building, tearing down, remodeling, adding to, re-roofing, moving or otherwise making changes to any structure, Residential or Commercial.
- Jurisdiction: This is the geographic area representing the properties over which a Permitting Authority has responsibility.
- GC: General Contractor. Usually the primary contractor hired for any Residential or Commercial construction work.
- **Sub:** Subordinate contracting companies or subcontractors. Usually a "trades" contractor working for the GC. These contractors generally have an area of expertise in which they are licensed like Plumbing, Electrical, Heating and Air systems, Gas Systems, Pools etc. (called "trades").
- Journeymen: Sub contractors who have their own personal licenses in one or more trades and work for different contracting companies, wherever they are needed or there is work.
- HVAC (Mechanical, Heating & Air companies): HVAC = Heating, Ventilation, and Air Conditioning.
- ELEC (Electrical, TempPole, TPole, TPower, Temporary Power, Panel, AMP Change, Power Release): Electrical permits can be pulled for many reasons. The most common reason is to increase the AMPs of power in an electrical power panel. This requires a permit in almost every jurisdiction. Other commons reason for Electrical permits is to insert a temporary power pole at a new construction site. Construction requires electricity, and in a new development, power has yet to be run to the lot. The temporary power pole is usually the very first permit pulled for new development. The power is released to the home owner when construction is complete and this sometimes takes the form of a Power Release permit or inspection.
- "Pull" a permit: To obtain and pay for a building permit.
- CBO: Chief Building Official
- Planning Department: The department in the development process where the building /structural plans are reviewed for their completeness and compliance with building codes
- Zoning Department: The department in the development process where the site plans are reviewed for their compliance with the regulations associated with the zoning district in which they are situated.
- Zoning District: A pre-determined geographic boundary within a jurisdiction where certain types of structures are permitted / prohibited. Examples are Residential structure, Commercial/Retail structures, Industrial/Manufacturing structures etc. Each zoning district has regulations associated with it like the sizes of the lots, the density of the structures on the lots, the number of parking spaces required for certain types of structures on the lots etc.
- PIN (TMS, GIS ID, Parcel#): Property Identification Number and Tax Map System number.
- State Card (Business license): A license card issued to a contractor to conduct business.
- Building Inspector (Inspector): The inspector is a building department employee that inspects building construction for compliance to codes.
- C.O.: Certificate of Occupancy. This is the end of the construction process and designates that the owners now have permission to occupy a structure after its building is complete. Sometimes also referred to as a Certificate of Compliance.

GLOSSARY

Permit Content Definitions

- Permit Number: The alphanumerical designation assigned to a permit for tracking within the building department system. Sometimes the permit number gives clues to its role, e.g. a "PL" prefix may designate a plumbing permit.
- Description: A field on the permit form that allows the building department to give a brief description of the work being done. More often than not, this is the most important field for EP's to find clues to the prior use(s) of the property.
- Permit Type: Generally a brief designation of the type of job being done. For example BLDG-RES, BLDG-COM, ELEC, MECH etc.

Sample Building Permit Data

Date: Nov 09, 2000 Permit Type: Bldg -

New Permit Number: 101000000405 Status: Valuation: \$1,000,000.00 Contractor Company: OWNER-BUILDER

Contractor Name:

Description: New one store retail (SAV-ON) with drive-thru pharmacy. Certificate of Occupancy.

EDR Topographic Map Library has been searched by EDR and maps covering the target property location as provided by Hovey Environmental were identified for the years listed below. EDR's Historical Topo Map Report is designed to assist professionals in evaluating potential liability on a target property resulting from past activities. EDRs Historical Topo Map Report includes a search of a collection of public and private color historical topographic maps, dating back to the late 1800s.

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-13), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E 2247-16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E 1528-14) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.

Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in bold italics are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

State and tribal leaking storage tank lists

LUST: Leaking Underground Storage Tank (LUST) Sites included in GeoTracker. GeoTracker is the Water Boards data management system for sites that impact, or have the potential to impact, water quality in California, with emphasis on groundwater.

A review of the LUST list, as provided by EDR, has revealed that there are 5 LUST sites within approximately 0.5 miles of the target property.

State and tribal registered storage tank lists

UST: The Underground Storage Tank database contains registered USTs. USTs are regulated under Subtitle I of the Resource Conservation and Recovery Act (RCRA). The data come from the State Water Resources Control Board's Hazardous Substance Storage Container Database.

A review of the UST list, as provided by EDR, has revealed that there is 1 UST site within approximately 0.25 miles of the target property.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Lists of Hazardous waste / Contaminated Sites

CERS HAZ WASTE: List of sites in the California Environmental Protection Agency (CalEPA) Regulated Site Portal which fall under the Hazardous Chemical Management, Hazardous Waste Onsite Treatment, Household Hazardous Waste Collection, Hazardous Waste Generator, and RCRA LQ HW Generator programs.

A review of the CERS HAZ WASTE list, as provided by EDR, and dated 04/09/2019 has revealed that there is 1 CERS HAZ WASTE site within approximately 0.25 miles of the target property.

Lower Elevation	Address	Direction / Distance	Map ID	Page
FAST GAS	1766 N HWY 101	SSE 0 - 1/8 (0.108 mi.)	C16	32

Local Lists of Registered Storage Tanks

SWEEPS UST: Statewide Environmental Evaluation and Planning System. This underground storage tank listing was updated and maintained by a company contacted by the SWRCB in the early 1990's. The listing is no longer updated or maintained. The local agency is the contact for more information on a site on the SWEEPS list.

A review of the SWEEPS UST list, as provided by EDR, and dated 06/01/1994 has revealed that there is 1 SWEEPS UST site within approximately 0.25 miles of the target property.

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 03/25/2019 has revealed that there are 3 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR Hist Auto: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Auto list, as provided by EDR, has revealed that there is 1 EDR Hist Auto site within approximately 0.125 miles of the target property.

Case Type: Cleanup Program Site

Case Worker: CF

Local Agency: SAN DIEGO COUNTY LOP

RB Case Number: Not reported File Location: Local Agency Potential Media Affected: Not reported Potential Contaminants of Concern: Not reported

Site History: DEH Case #H39778-001 was opened under the Voluntary Assistance Program (VAP) to mitigate soil impacted by organochlorine pesticides.

> Former residences on the properties at 1859 and 1869 North Vulcan Avenue in Encinitas were demolished circa 2006 in anticipation of planned new residential construction. Preliminary grading of the properties was performed following demolition activities. Redevelopment is currently planned that would result in the construction of five residential units. Due to prior agricultural use of the property, testing of site soils for organochlorine pesticides was recommended in a Phase I Environmental Assessment Report and Limited Soil Sampling Report (Geocon, 2011). Twelve soil samples were initially collected from six hand-augered borings to a maximum depth of 1.0 foot below ground surface (bgs). A direct-push rig was used to collect an additional eight samples from depths of 2.0 and 3.0 feet bgs, respectively, at four of the hand auger boring locations. The soil samples were tested for arsenic and organochlorine pesticides. Arsenic was not detected in the 20 samples submitted for laboratory analysis. Four organochlorine pesticides were detected in the samples, including 4,4-DDE, 4,4-DDT, chlordane, and heptachlor. Chlordane was detected in all of the samples, but concentrations in eight of these samples exceeded its residential California Human Health Screening Level (CHHSL) of 0.43 milligrams per kilogram (mg/kg). The CHHSL was not exceeded in the samples collected below a depth of 2 feet. The detected chlordane concentrations ranged from 0.14 to 2.14 mg/kg. Analytical results for the other detected organochlorine pesticides did not exceed their respective residential

> CHHSLs. A remedial action plan (RAP) was submitted for review under the VAP in November 2011. The RAP proposed removal of soil at the property characterized by chlordane concentrations that equaled or exceeded its residential CHSSL. The RAP was conditionally approved by DEH on January 25, 2012. Excavation activities at the site began on January 31, 2012. Two, high-volume, air samplers were in operation during earth-moving activities. An initial lift was removed to a

depth of 1.5 feet bgs. The excavated soil was temporarily stockpiled

Direction Distance

Elevation Site Database(s) EPA ID Number

5-UNIT RESIDENTIAL PROPERTY (Continued)

S111346985

EDR ID Number

in the northeast corner of the site. Thirteen verification soil samples were then collected at a frequency of one sample per 25 x 25-foot grid. Chlordane concentrations detected in seven of the verification samples exceeded its residential CHHSL. Additional excavation was then performed at the seven soil sampling locations to depths of 2 to 3 feet bgs. The stockpiled soil was transported offsite for disposal. A second round of verification sampling was performed at these locations and an initial sample was collected beneath the former stockpile location. Results for the samples indicated that further soil removal was necessary at two sampling locations. The excavation was advanced to a depth of four feet and a third round of verification sampling was performed at these two locations. Analytical results for these two samples were below the residential CHSSL for chlordane. No further excavation was performed. The remaining excavated soil at the site was transported offsite to a disposal facility. A total of 978 tons of soil was exported to an off-site disposal facility. Fill materials imported from a quarry was used to backfill the excavation. Based on the removal of pesticide-impacted soil from the site, the consultant (Stantec) has recommended no further action at the site and case closure. DEH concurs with these recommendations.

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Federal Delisted NPL site list

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Federal CERCLIS NFRAP site list

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that based upon available information, the location is not judged to be potential NPL site.

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Federal RCRA generators list

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

DEED: Deed Restriction Listing

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method. This database begins with calendar year 1993.

WASTEWATER PITS: Oil Wastewater Pits Listing

Water officials discovered that oil producers have been dumping chemical-laden wastewater into hundreds of unlined pits that are operating without proper permits. Inspections completed by the Central Valley Regional Water Quality Control Board revealed the existence of previously unidentified waste sites. The water boards review found that more than one-third of the region's active disposal pits are operating without permission.

WDR: Waste Discharge Requirements Listing

In general, the Waste Discharge Requirements (WDRs) Program (sometimes also referred to as the "Non Chapter 15 (Non 15) Program") regulates point discharges that are exempt pursuant to Subsection 20090 of Title 27 and not subject to the Federal Water Pollution Control Act. Exemptions from Title 27 may be granted for nine categories of discharges (e.g., sewage, wastewater, etc.) that meet, and continue to meet, the preconditions listed for each specific exemption. The scope of the WDRs Program also includes the discharge of wastes classified as inert, pursuant to section 20230 of Title 27.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historical Auto Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:

Elevation: 66 ft. above sea level

USGS TOPOGRAPHIC MAP

Target Property Map: 5641296 ENCINITAS, CA

Version Date: 2012

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

- 1. Groundwater flow direction, and
- 2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General NW

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

Additional Panels in search area: FEMA Source Type

06073C1030G FEMA FIRM Flood data

NATIONAL WETLAND INVENTORY

NWI Quad at Target Property Data Coverage

ENCINITAS YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius: 1.25 miles Status: Not found

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

LOCATION GENERAL DIRECTION

MAP ID FROM TP GROUNDWATER FLOW

Not Reported

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

Soil Map ID: 1

Soil Component Name: MARINA

Soil Surface Texture: loamy coarse sand

Hydrologic Group: Class B - Moderate infiltration rates. Deep and moderately deep,

moderately well and well drained soils with moderately coarse

textures.

Soil Drainage Class: Somewhat excessively drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: Moderate

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

	Soil Layer Information							
Boundary			Boundary Classifica	fication	Saturated hydraulic			
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil	conductivity micro m/sec	Soil Reaction (pH)	
1	0 inches	9 inches	loamy coarse sand	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 141 Min: 42	Max: 8.4 Min: 7.4	
2	9 inches	57 inches	loamy sand	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 141 Min: 42	Max: 8.4 Min: 7.4	
3	57 inches	59 inches	sand	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 141 Min: 42	Max: 8.4 Min: 7.4

HYDROGEOLOGIC INFORMATION

AQUIFLOW^R Information System

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit

Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

PROPERTY INFORMATION SHEET

(For the sale or leasing of non-residential properties)

PREFACE:

Purpose: This Statement is NOT a warranty as to the actual condition of the Property/Premises. The purpose is, instead, to provide the brokers and the potential buyer/lessee with important information about the Property/Premises which is currently in the actual knowledge of the Owner and which the Owner is required by law to disclose.

Actual Knowledge: For purposes of this Statement the phrase 'actual knowledge' means; the awareness of a fact, or the awareness of sufficient information and circumstances so as to cause one to believe that a certain situation or condition probably exists.

TO WHOM IT MAY CONCERN:

Gary Dewitt. The Gary Dewitt. Trust ("Owner"), owns the Property/Premises commonly known as (street address, city, state, zip) 1800 N Coast Hwy 181. Encinitias, California 92024 located in the County of San Diego, and generally described as (describe briefly the nature of the Premises or Property) the property along with the buildings located thereon consisting of approximately 35,283 square feet of land area (hereinafter "Property"), and certifies that:

1. Material Physical Defects. Owner has no actual knowledge of any material physical refects in the Property or any Improvements and structures thereon, including, but not limited to the roof, except (if there are no exceptions write "NONE"):

Equipment.

- A. Owner has no actual knowledge that the heating, ventilating, air conditioning, plumbing, loading doors, electrical and lighting systems, life safety systems, security systems and mechanical equipment existing on the Property as of the date hereof, if any, are not in good operating order and condition, except (if there are no exceptions write "NONE"):
- B. Owner has no actual knowledge of any leases, financing agreements, liens or other agreements affecting any equipment which is being included with the Property, except (if there are no exceptions write "NONE"):
- 3. Soil Conditions. Owner has no actual knowledge that the Property has any slipping, sliding, settling, flooding, ponding or any other grading, drainage or soil problems, except (if there are no exceptions write "NONE"):
- 4. Utilities. Owner represents and warrants that the Property is served by the following utilities (check the appropriate boxes). A public sewer system and the cost of installation thereof has been fully paid, private septic system. A electricity, a natural gas, to domestic water, a telephone, and the other:
- 5. Insurance. Owner has no actual knowledge of any insurance claims filed regarding the Property during the preceding 3 years, except (if there are no exceptions write "NONE"):
- 6. Compliance With Laws. Owner has no actual knowledge of any aspect or condition of the Property which violates applicable laws, rules, regulations, codes, or covenants, conditions or restrictions, or of improvements or alterations made to the Property without a permit where one was required, or of any unfulfilled order or directive of any applicable government agency or of any casualty insurance company that any work of investigation, remediation, repair, maintenance or improvement is to be performed on the Property, except (if there are no exceptions write "NONE"):

7. Hazardous Substances and Mold.

PI-8.03, Revised 06-10-2019

- A. Owner has no actual knowledge of the Property ever having been used as a waste dump, of the past or present existence of any above or below ground storage tanks on the Property, or of the current existence on the Property of asbestos, transformers containing PCB's or any hazardous, toxic or infectious substance whose nature and/or quantity of existence, use, manufacture or effect, render it subject to Federal, state or local regulation, investigation, remediation or removal as potentially injurious to public health or welfare, except (if there are no exceptions write "NONE"):
- 8. Owner represents and warrants that it is not currently, and never has been engaged in the business of hauling waste, and never stored hazardous substances on the Property, except (if there are no exceptions write "NONE"):
- C. Owner has no actual knowledge of the existence on the Property of hazardous levels of any mold or fungi defined as toxic under applicable state or Federal Aw, except (if there are no exceptions write "NONE"):
- 8. Fire Damage. Owner has no actual knowledge of any structure on the Property having suffered material fire damage, except (if there are no exceptions write "NONE"):
- 9. Actions, Suits or Proceedings. Owner has no actual knowledge that any actions, suits or proceedings are pending or threatened before any court, arbitration tribunal, governmental department, commission, board, bureau, agency or instrumentality that would affect the Property or the right or ability of an owner or tenant to convey, occupy or utilize the Property, except (if there are no exceptions write "NONE"):

 Owner has not served any Notices of Default on any of the tenants of the Property which have not been resolved except (if there are no exceptions write "NONE"):

10.	Governmental Proceedings.	Owner has no actual knowledge of any existing or contemplated condemnation, environmental, zoning, redevelopment agency
plan	or other and use regulation p	proceedings which could detrimentally affect the value, use and operation of the Property, except (if there are no exceptions write
"NO	NE"): DONE

EDR Environmental Lien and AUL Search

EDR Environmental Lien and AUL Search

The EDR Environmental Lien and AUL Search Report provides results from a search of available current land title records for environmental cleanup liens and other activity and use limitations, such as engineering controls and institutional controls.

A network of professional, trained researchers, following established procedures, uses client supplied address information to:

- · search for parcel information and/or legal description;
- search for ownership information;
- research official land title documents recorded at jurisdictional agencies such as recorders' offices, registries of deeds, county clerks' offices, etc.;
- access a copy of the deed;
- search for environmental encumbering instrument(s) associated with the deed;
- provide a copy of any environmental encumbrance(s) based upon a review of key words in the instrument(s) (title, parties involved, and description); and
- provide a copy of the deed or cite documents reviewed.

Thank you for your business.

Please contact EDR at 1-800-352-0050 with any questions or comments.

CERTIFICATION AND STATEMENT OF LIMITING CONDITIONS FOR PHASE I ENVIRONMENTAL SITE ASSESSMENT

SUBJECT PROPERTY:	1900 N Highway 101	Encinitas	CA	92024
_	STREET ADDRESS	CITY	STATE	ZIP
Encine	tas Beach Plaza Venture,	LC		
CLIENT NAME: Ferrier	y Properties, Attn: Bryan Smith	PROJECT	f: 19454-01	

RI N<u>OTHE AGREEMENT CAREFULLY - IT IS A LEGALLY BINDING CONTRACT</u>

Certification: Hovey Environmental LLC certifies to the Principal Parties; and Hovey Environmental LLC and the Principal Parties agree that:

- Hovey Environmental LLC has no present or contemplated future (a) partnership with Principal Parties
 nor (b) any interest in the property inspected which could adversely affect the Hovey Environmental
 LLC's ability to perform an objective inspection; and neither the employment of Hovey Environmental
 LLC to conduct the inspection, nor the compensation for it, is contingent on the results of the
 inspection.
- 2. Hovey Environmental LLC has no personal interest in or bias with respect to the subject matter of the inspection report or any parties who may be part of a financial transaction involving the property. The conclusions and recommendations of the report are not based in whole or in part upon the race, color, creed, sex, or national origin of any of the Principal Parties.
- 3. Hovey Environmental LLC will personally inspect the property, both inside and out and will make visual inspection of adjacent properties, to the extent possible by readily available access. The inspection does not include the removal of any soil, water or air samples, the moving of furniture or fixtures, or any type of inspection that would require extraordinary effort to access.
- All contingent and limiting conditions are contained herein (imposed by the terms of the inspection assignment or by the undersigned affecting the conclusions and recommendations contained in the report.)
- 5. The Inspection and Inspection report will be performed in accordance with ASTM 1527-13, Code of Federal Regulations Part 312 Standard Practices for All Appropriate Inquiries, and made in conformity with and is subject to the requirements of the Code of Professional Ethics of the Environmental Assessment Association.
- 6. All opinions, conclusions, and recommendations concerning the inspected property that are set forth in the inspection report will be prepared by Hovey Environmental LLC. No change of any item in the report shall be made by anyone other than Hovey Environmental LLC, and Hovey Environmental LLC shall have no responsibility for any such unauthorized change.

ſ	7/4/
1	
1	Client Signature
٠.	

Contingent and Limiting Conditions: The certification of Hovey Environmental LLC appearing in the environmental inspection report is subject to the following conditions and to such other specific and limiting conditions as are set forth by Hovey Environmental LLC in the report.

- 1. Hovey Environmental LLC assumes no responsibility for matters of a legal nature affecting the property inspected or the title thereto. The property is inspected assuming responsible ownership.
- Any sketch appearing in or attached to the inspection report, or any statement of dimensions, capacities, quantities or distances, are approximate and are included to assist the reader in visualizing the property and the use is limited to this purpose. Hovey Environmental LLC will make no survey of the property.
- 3. Hovey Environmental LLC is not required to give testimony or appear in court because of having made the inspection with reference to the property in question, unless arrangements have been previously made thereof. If Hovey Environmental LLC is called to give testimony as a result of the Environmental Inspection, additional fees will be charged at Hovey Environmental LLC's then current fee rates for any time spent including but not limited to research, consultation, additional inspection time, preparation of reports, travel, time waiting to testify and court appearances or depositions or sworn statements.
- 4. This report is not intended to have any direct effect on the value of the property inspected but simply to provide a visual Environmental Assessment solely for the benefit of the Principal Parties.
- 5. Hovey Environmental LLC assumes that there are no hidden, unapparent, or latent conditions or defects in or of the property, subsoil, or structures, other than those noted on the inspection report or any addendum to the report which the Inspector will include. Hovey Environmental LLC assumes no responsibility for such conditions or for the inspection, engineering, or repair which might be required to discover or correct such factors. The Phase I ESA is an inspection only. Hovey Environmental LLC will not take samples from the property or perform any tests on the property as part of this agreement.
- 6. Information, estimates and opinions furnished to Hovey Environmental LLC, and contained in the report, were obtained from sources considered reliable and believed to be true and correct on the date they were obtained. However, Hovey Environmental LLC has made no independent investigation as to such matters and undertakes no responsibility for the accuracy of such items, including but not limited to federal, state, and local government databases, historical archives, maps, tax files, title records, and land use records.
- 7. The Inspection and Inspection Report are made by Hovey Environmental LLC solely for the benefit and personal use of the Principal Parties. Disclosure of the contents of the Inspection Report is governed by the Bylaws and Regulations of the Environmental Assessment Association. No disclosure may be made of the Inspection Report without the prior written consent of Hovey Environmental LLC and Hovey Environmental LLC undertakes no responsibility for harm or damages to any party other than the Principal Parties arising from or in any way connected to the report.
- 8. Neither the Inspection Report, any part thereof, nor any copy of the same (including conclusions or recommendations, the identity of the Inspector, professional designation, reference to any professional organization, or the firm with which the inspector is connected), shall be used for any purposes by anyone but the Principal Parties. The report shall not be conveyed by anyone to the public through advertising, public relations, news, sales, or other media, without the prior written consent and approval of Hovey Environmental LLC.

Client Signature

- 9. This Agreement and the documents referred to herein constitute the entire Agreement between the parties hereto and supercede any and all prior representations, discussions or agreements whether written or oral. No amendment, change or variance from this Agreement shall be binding on either party unless mutually agreed to in writing and signed by the parties hereto. If any provision of this agreement is held invalid or unenforceable by any court of final jurisdiction, it is the intent of the parties that all other provisions of this Agreement be construed to remain fully valid, enforceable and binding on the parties.
- THE INSPECTION AND INSPECTION REPORT DO NOT CONSITUTE A WARRANTY, GUARANTEE OR INSURANCE POLICY OF ANY KIND. There are no warranties, guarantees or insurance available or provided by Hovey Environmental LLC.

Having read and fully understanding this Agreement, I hereby authorize the inspection of the subject property.
