

Engineering Plan Index Viewer application – as of August 2018

How To Use:

- To get to a location, pan and zoom around the map, or type an address into the upper left box
- Click on a blue polygon to get information
- To show the document being identified, click the "More info" link in the popup.

Data Maintenance:

Drawings get scanned into the City's document management system, and then boundaries get added to GIS. This is an ongoing process and updates are performed by City staff. Drawings in the app date back to the 1950s and are maintained to the present date. There can be a backlog – so the most recent drawings may not yet be available. Staff tries to get drawings into the app within 30 days or less of being scanned.

Most Types of Plans Found in the App:

- **CG:** Improvement plan from a County of San Diego (pre-City of Encinitas) permit
- **CS:** Cardiff Sanitation District sewer improvements
- **DI:** Drainage Capital Improvement Project (CIP)
- **G:** Grading plan
- **I:** Improvement plan
