

# FACT SHEET

UPDATED: 06.15.22

## PROJECT STATUS

The project was kicked off in the spring of 2022. Evaluation of ideal charging station locations is underway and public outreach has been initiated.

## PROJECT BUDGET

\$50,000

## PROJECT LOCATION

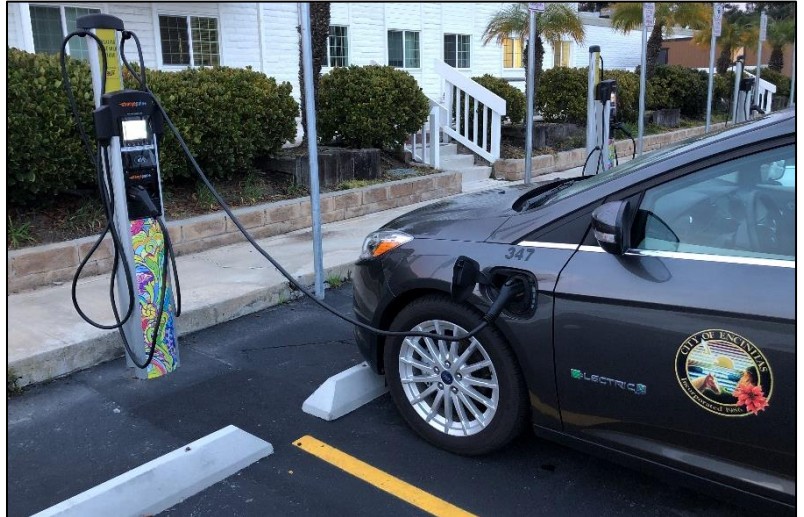

Citywide

## CONTACT US

For questions about the project, please contact Crystal Najera, Sustainability Manager, at: [cnajera@encinitasca.gov](mailto:cnajera@encinitasca.gov)

# Electric Vehicle Charging Station Master Plan

## ABOUT THE PROJECT

Pursuant to [Executive Order N-79-20](#), signed into effect by Governor Gavin Newsom in 2020, the State of California has set an aggressive target to ensure that all new passenger vehicles be zero emission by 2035. In order to support this statewide initiative, the City desires to ensure that infrastructure is in place to support the needs of these vehicles, most of which will likely be all-electric.

The main objective of this planning process is to conduct a needs assessment; evaluate and locate electric vehicle (EV) charging stations within the City using gap analysis; define station location alternatives; develop a plan to install EV charging stations throughout the community, including at City-owned public facilities and rights-of-way, employment centers, businesses, and residential areas; and provide recommendations to support residents to transition from fossil fuel vehicles to clean transportation options. The City is seeking public feedback until Friday, July 15, 2022. Please visit [this link](#) to learn more and provide comments using an interactive online map. The comments provided will serve as valuable information as the City moves toward its goal of making community EVCS more readily available.

This project aligns with the environmental focus area of the Encinitas Strategic Plan. This project also supports the City's Climate Action Plan, supporting the avoidance of transportation-related greenhouse gas (GHG) emissions.
