EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historical Auto Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

EDR Hist Cleaner: EDR Exclusive Historical Cleaners

EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

This map includes information copyrighted by PennWell Corporation. This information is provided on a best effort basis and PennWell Corporation does not guarantee its accuracy nor warrant its fitness for any particular purpose. Such information has been reprinted with the permission of PennWell.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:

Source: American Hospital Association, Inc.

Telephone: 312-280-5991

The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing

Source: Centers for Medicare & Medicaid Services

Telephone: 410-786-3000

A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

Nursing Homes

Source: National Institutes of Health

Telephone: 301-594-6248

Information on Medicare and Medicaid certified nursing homes in the United States.

Public Schools

Source: National Center for Education Statistics

Telephone: 202-502-7300

The National Center for Education Statistics' primary database on elementary and secondary public education in the United States. It is a comprehensive, annual, national statistical database of all public elementary and secondary schools and school districts, which contains data that are comparable across all states.

Private Schools

Version Date:	2012
West Map:	5641296 ENCINITAS, CA
Version Date:	2012

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General ESE

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

<u>Flood Plain Panel at Target Property</u>	<u>FEMA Source Type</u>
06073C1061G	FEMA FIRM Flood data

NATIONAL WETLAND INVENTORY

<u>NWI Quad at Target Property</u>	<u>NWI Electronic Data Coverage</u>
RANCHO SANTA FE	YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius:	1.25 miles
Status:	Not found

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

<u>MAP ID</u>	<u>LOCATION FROM TP</u>	<u>GENERAL DIRECTION GROUNDWATER FLOW</u>
Not Reported		

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

ROCK STRATIGRAPHIC UNIT

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

Soil Map ID: 1

Soil Component Name: ROUGH BROKEN LAND

Soil Surface Texture: unweathered bedrock

Hydrologic Group: Class D - Very slow infiltration rates. Soils are clayey, have a high water table, or are shallow to an impervious layer.

Soil Drainage Class:
Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil		
1	0 inches	1 inches	unweathered bedrock	Not reported	Not reported	Max: Min:	Max: Min:

Soil Map ID: 2

Soil Component Name: ALTAMONT

Soil Surface Texture: clay

Hydrologic Group: Class D - Very slow infiltration rates. Soils are clayey, have a high water table, or are shallow to an impervious layer.

Soil Drainage Class: Well drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	20 inches	clay	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	Not reported	Max: Min:	Max: Min:
2	20 inches	25 inches	clay	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	Not reported	Max: Min:	Max: Min:
3	25 inches	29 inches	weathered bedrock	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	Not reported	Max: Min:	Max: Min:

Soil Map ID: 3

Soil Component Name: ALTAMONT

Soil Surface Texture: clay

Hydrologic Group: Class D - Very slow infiltration rates. Soils are clayey, have a high water table, or are shallow to an impervious layer.

Soil Drainage Class: Well drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	20 inches	clay	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	Not reported	Max: Min:	Max: Min:
2	20 inches	29 inches	clay	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	Not reported	Max: Min:	Max: Min:
3	29 inches	33 inches	weathered bedrock	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	Not reported	Max: Min:	Max: Min:

Soil Map ID: 4

Soil Component Name: CORRALITOS

Soil Surface Texture: loamy sand

Hydrologic Group: Class A - High infiltration rates. Soils are deep, well drained to excessively drained sands and gravels.

Soil Drainage Class: Somewhat excessively drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: Moderate

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil

HYDROGEOLOGIC INFORMATION

AQUIFLOW^R Information System

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit

Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by Construction Testing & Eng. were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

Limited Permission To Make Copies

Construction Testing & Eng. (the client) is permitted to make up to FIVE photocopies of this Sanborn Map transmittal and each fire insurance map accompanying this report solely for the limited use of its customer. No one other than the client is authorized to make copies. Upon request made directly to an EDR Account Executive, the client may be permitted to make a limited number of additional photocopies. This permission is conditioned upon compliance by the client, its customer and their agents with EDR's copyright policy; a copy of which is available upon request.

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Report is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Report includes a search of available city directory data at 5 year intervals.

RECORD SOURCES

EDR's Digital Archive combines historical directory listings from sources such as Cole Information and Dun & Bradstreet. These standard sources of property information complement and enhance each other to provide a more comprehensive report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer. Reproduction of City Directories without permission of the publisher or licensed vendor may be a violation of copyright.

Inspection | Testing | Geotechnical | Environmental & Construction Engineering | Civil Engineering | Surveying

DAN T. MATH, RCE, GE

TITLE: Principal Engineer

EDUCATION:

Bachelor of Science,
San Diego State University
Civil & Environmental Engineering Major

CERTIFICATIONS:

Registered Civil Engineer, State of California, #61013
Registered Civil Engineer, Guam, #1616
Registered Geotechnical Engineer, State of California, #2665
U.S.A.C.E. Construction Quality Management for Contractors Certificate

EXPERIENCE:

**6/97 to
Present**

CONSTRUCTION TESTING & ENGINEERING, INC.

Responsibilities include overseeing operations of the entire environmental consulting group. Responsible for overall technical supervision of professional, technical, and field staff for Oxnard, Riverside, and (Corporate) San Diego Offices. Provides principal review and supervised for all environmental engineering activities. Extensive experience in proposal and technical report preparation, client development, and contract review. Diverse background includes working with public and private clients, municipalities, federal government, and school districts. Frequently communicates with oversight agencies including the Division of the State Architect, California Geologic Society, and State of California agencies such as the Department of Toxic Substances Control. Also coordinates with local municipal agencies such as the City San Diego Department of Planning and Land Use and the County of San Diego.

Provides technical supervision of environmental investigations, assessments, and remediation projects. Specifically, supervise staff in the performance of Phase I and II Environmental Site Assessments, as well as remediation projects or sites. Projects typically include soil and groundwater monitoring and remediation, documentation and regulatory closure.

**9/95 to
6/97**

CITY of SAN DIEGO

Engineering & Capital Projects Division. Duties included, but not limited to, deep foundations design and construction, designing and rehabilitating city infrastructure systems and property. Reviewed and approved inspection reports. Supervised, reviewed and regulated non-city personnel during installations of shallow and deep foundations for public and private improvements.

**6/93 to
8/96**

LAW PLUMBING COMPANY

Equipment operator-pipe layer. Duties included, but were not limited to, removal and remediation of Underground Storage Tanks and associated dispensary facilities, and disposal of non-hazardous and hazardous wastes.

GREGORY F. RZONCA, P.G., C.E.G

TITLE: Senior Certified Engineering Geologist

EDUCATION: Bachelor of Science - Geology
California State University Los Angeles

CERTIFICATIONS: Professional Geologist, California PG #3836
Certified Engineering Geologist, California CEG #1191
Registered Geologist, Arizona RG #26468
Professional Engineer (Geological), Arizona #28058
Certified Environmental Manager, Nevada #EM 1591
40 Hour HAZWOPER Trained
Eight Hour Health and Safety Supervisors Trained
Eight Hour Health and Safety Refresher Trained

BACKGROUND: Over thirty eight years of progressively responsible professional geotechnical and environmental service experience. Responsible for implementation and direction of work teams performing detailed geotechnical and environmental work in southwestern United States. Successfully scopes projects, prepares proposals, implements projects and provides follow up services. Geotechnical projects he performs are mass graded tract development, commercial structures, public facilities including water works reservoirs and pipelines, lead geotechnical consultant for multiple municipalities and dams. The work included evaluation of earth material properties, landslides and fault hazards. Environmental work includes performance and direction of work teams performing 100s of Phase I and Phase 2 Environmental Site Assessments, environmental interface with regulatory agencies including City and County regulators, and remedial activities conducted for private and federal institutions. Typical environmental projects he performs are fuel dispensing facilities, dry cleaner operations, landfills, ranches and farms where past practices may lead to environmentally impacted soil and groundwater media. Currently an on-call expert certified engineering geologist consultant to the State of California Board for Engineers, Land Surveyors and Geologists.

EXPERIENCE:

- 2006 to Present** **CONSTRUCTION TESTING & ENGINEERING, INC, San Diego, CA**
Senior Certified Engineering Geologist
Performs geotechnical and environmental work for private entities. Geotechnical work includes evaluation of earth material properties, landslide potential and fault hazard for private developments. Scope of work includes proposal preparation, work implementation and report preparation for mass graded and site specific residential and commercial developments. Environmental work includes Phase 1 and Phase 2 environmental site assessments for commercial and private facilities. These facilities include, dry cleaners, uncontrolled grading sites, public facilities, and commercial developments. Soil and groundwater media were evaluated for environmental impacts and risk assessment or remedial activities were performed as required by regulatory agencies. Site characterization of military facilities identified Installation and Restoration (IR) sites
- 2003 to 2006** **GEOCON, INC., San Diego, CA**
Senior Certified Engineering Geologist
Senior certified engineering geologist and project manager for large mass graded properties in San Diego area. Work included field investigations, in grading observations and mapping, direction of technician staff, client interface, meeting with public agency staff, and budget preparation and management. Performed preliminary geotechnical investigations, update geotechnical investigations and as built reports for grading and improvements. Terrain where projects were located included locations of hard non rippable rock and soft saturated alluvium which required special handling.
- 1997 to 2003** **MACTEC ENGINEERING AND CONSULTING (FORMERLY LAW/CRANDALL), San Diego, CA and Phoenix, AZ**
Principal Certified Engineering Geologist
Started in the Phoenix office responsible for office environmental activities, and transferred to the San Diego office in 1999. Advanced from senior engineering geologist to principal engineering geologist by verbal interview with a corporate review board. Project manager responsible for profit and loss of various projects conducted for public and private entities. Responsible for technical review and company policy QA/QC procedures implementation on multiple projects and proposals. Reviewed contracts for compliance with company requirements. Geotechnical work included evaluation of damaged and failed surface water conveyance systems and for development of public facilities. Directed work teams and directly performed work. Environmental work included evaluation of potential impacts to surface water, soil and groundwater media for public and private facilities

-
- 1995 to 1997** **TERRACON CONSULTANTS, Phoenix**
Senior Environmental Engineer
Geotechnical performed work included the Kitty Joe Bridge north of Sunflower, Arizona, a high pressure natural gas pipeline crossing beneath Sycamore Creek near Sedona, Arizona, and a forensic evaluation of a distressed road way crossing a filled canyon on the Ute Indian Nation, Colorado. Performed and directed work teams on implementation of Phase I and Phase II environmental assessments throughout the southwestern United States. Prepared documentation for clean closure of facilities.
- 1992 to 1995** **DAMES & MOORE, Phoenix, AZ**
Environmental Engineer/Business Unit Leader
Managed and directed a group performing Phase I and Phase 2 Environmental Site Assessments. Provided staff direction and resources to implement work. Performed and directed work teams on preparation of Phase I and Phase II Environmental Site Assessments throughout the southwestern United States. Projects included private and public facilities including a new baseball park for Phoenix. Responsible for profit and loss of the group and significantly increased profitability.
- 1986 to 1992** **CONVERSE CONSULTANTS, Pasadena, CA**
Principal Certified Engineering Geologist
Progressed from project to principal certified engineering geologist working on a variety of geotechnical projects. Directed work teams performing detailed geotechnical investigations. Supervised preparation of geologic interpretations and graphics. Prepared and reviewed reports. Performed geotechnical review tasks for the City of Palmdale and the City of Santa Clarita. Environmental work included direction of work teams performing Phase I Environmental Site Assessments, and Phase 2 characterization of leaking underground storage tank incidents.
- 1978 to 1986** **MOORE & TABER, Anaheim, CA**
Project Engineering Geologist
Progressed from staff engineering geologist to project engineering geologist. Performed a variety of tasks including forensic evaluations, fault hazard evaluations, landslide investigations, forensic investigations of distressed properties, and mass grading observations. Directed field investigations by various drill rigs, backhoes and hand excavations. Prepared cross sections and geologic maps providing interpretations of geologic conditions, and prepared written reports. Responsible for project implementation and report preparation. Became a professional geologist and certified engineering geologist in 1984.
